

A Spacious, Wheelchair-Accessible Homelift

Stiltz Homelifts are available in the wheelchair-friendly, 3-person Trio+ model or a more compact 2-person Duo+ model along with our entry level Classic range.

The Trio+ has been designed to offer more space and comfort for homeowners who need a larger lift for their home.

A gently-angled, integral ramp and wider entrance/exit space helps make access super-easy for wheelchair users or those who struggle with steps.

Stiltz work in partnership with OTs to attend home assessment visits. Importantly, urgent orders can be fast-tracked and prioritised efficiently as all installations are carried out by our own fully-trained Stiltz teams.

The Stiltz Homelifts team work in close partnership with healthcare professionals across the UK.
